

KEWAM1 - Anemometer

Kewtech's range of environmental instruments are targeted at the electrical contractors legal requirements.

Part F of the building regulations requires the measurement of ventilation airflows. Traditionally installers have relied on the published output of a fan but as the installation has a big influence on the actual output achieved the latest regulations means that ventilation systems have to be measured and reported to building control.

- Measures up to 30.00 m/s
- Beats minimum accuracy requirement
- Advanced auto-backlight LCD display
- Min / max hold
