KEWTECH

Printer Set up

To check the information

- Power on
- Hold down the **POWER** key for five seconds, then release
- **INFORMATION** shows
- Press the POWER key to scroll through the **INFORMATION** list

> **SPEED – NORMAL**
> **DEEP – NORMAL**
> **PAPER – LABEL**
> **CMD – TSPL**
> **SENSOR –**
> **THROUGH**
> **LANGUAGE – ENG**
> **FACTORY**

The above are the correct settings. To change the settings, press the **FEED** key until you see the correct detail and then press **POWER** to set.

If the labels keep feeding through, press and hold the **FEED** key until either a series of numbers appears (older model) or you can hear a "ding" (latest model) and this will reset the label feed.

Please note. Always keep the ceramic contacts free of debris/adhesive.
