

KEW2200

The World's slimmest 1000 A Clamp.

From the market leaders in Clamp Meters the KEW2200 represents another first. This 1000A clamp has jaws that are only 10mm thick and together with the tear drop shape makes for easy access into distribution boards and cramped spaces and also reads down to 0.01 A.

The instrument comes with top quality G7 test leads and a carry case that can be looped on to your belt.
